

Day 2 Technical plan for the marketplace.

Frontend : I will use Next.js & Tailwind CSS.

Backend : I will use Sanity CMS to manage product data and will migrate it to Sanity CMS.

API : I will use the provided API to fetch data and will migrate it to Sanity CMS.

Workflows:

Product management :

Shop owner uploads product and manage inventory using Sanity CMS.

By: Ahsan Durrani

Product sync with the function is new  
comes

Custom order workflow  
comes because product  
status change and provide checkout  
page details.

The system sends order details  
to the admin to view them with  
Emails.

Notifications:

admin receives email notifications  
for each new order.
